Gain product knowledge from our online marketing materials library. This button directs you to the "Product Brochures" page, which lists our custom-designed brochures and product guides. By clicking on the desired graphic, you will automatically start downloading the Adobe PDF document.

What Is A QR Code?

A QR code (abbreviated from Quick Response code) is a type of matrix barcode that consists of black modules arranged in a square pattern on a white background. The code was designed to allow its contents to be decoded at high speed and has gained popularity due to its fast readability and comparatively large storage capacity.

QR codes can be read by almost any phone with a camera. There are a variety of QR code readers/software applications available to download from the internet for free, which will come in handy when viewing this catalog. Scan the desired QR code and immediately be connected to Bagcraft.com for additional information.

TRY IT NOW!

Once you have downloaded the QR Code Reader, scan the QR Code below to automatically visit Bagcraft.com home page

Pan Liners

Grease Proof Pan Liners With Standard Release

- EcoCraft® Artisan Pan Liners are made from unbleached, grease proof paper and are compostable under the ASTM D-6868 and D-6400-04 standard
- We offer a broad selection of sizes and case packs

Performance Innovation

DublWax® Deli Paper

Introducing DublWax® interfolded deli paper – offering superior performance at an affordable price.

Our innovative DublWax® manufacturing technology produces a deli paper with uniform wax coverage and deeper wax penetration versus standard deli paper.

Download DublWax® Deli Paper Brochure

Interfolded Sheets

DublWax® Deli Paper

- Efficient 750 sheet pop-up dispenser carton improves source reduction
- Same standard 6,000 sheet master case, but packed in eight dispenser cartons instead of 12
- 36% smaller case cube means less space required for storage
- Superior moisture resistance provides a safe and sanitary barrier
- Multiple uses – basket liner, food wrap, scale sheet, and food handling
- Use as a cover sheet to reduce mess and splatter in the microwave

Source Reduction Innovation!

50% more sheets/carton

Coated Over Ink:

A basket liner featuring a printed design layer on top with a high-performance, wax-blend coating – provides a safe barrier between the food and ink.

Coated One Side:

A food wrap featuring a high-performance wax-blend coating on one side providing a superior moisture and grease barrier. Coated one side wraps can be printed on the un-waxed side of the wrap.

Barrier Wax Wraps & Basket Liners

- Superior grease and moisture resistance
- Economical and functional solution for a broad range of applications
- Improved heat retention versus grease resistant and dry wax paper wraps
- Top choice of major quick service restaurants due to high-performance and economic value

Performance Innovation

Dubl Shield® Wraps

Introducing the state of the art packaging solution for the next generation of food wrap applications.

Dubl Shield® is a multi-function professional grade food wrap providing excellent moisture resistance, breathability, heat retention, compostability, grease resistance and a high quality upscale appearance.

Triangle shaped design creates insulating air pockets between the two paper sheets keeping food hot and fresh longer than standard wraps

Download Dubl Shield® Wraps Brochure

Dubl Shield® Wraps

- High-performance multi-function wrap for a wide range of demanding applications
- Excellent moisture and grease resistance
- Superior heat retention keeps food hot longer than standard one and two ply paper wraps
- Innovative functionality keeps different varieties of bread moist or crisp depending on which side of the wrap contacts the food
- Upgrade the sustainability of your packaging with the combined benefits of EcoCraft® and commercial compostability

Butcher & Freezer

Performance Innovation

EcoCraft® Freezer Paper

EcoCraft®'s breakthrough Freezer Paper lowers costs, improves sustainability, and enhances food quality.

We've significantly enhanced sustainability by reducing paper consumption and poly material needed to meet functionality requirements in our improved freezer paper product line.

Download EcoCraft® Freezer Paper Brochure

EcoCraft® Freezer Paper Rolls

- Improved sustainability due to less paper and poly material needed to meet functionality requirements offering an innovative product design
- Less reliance on petroleum based poly resin which is non-renewable
- Reduced paper fiber used due to a 80% recycled sheet with 40% post-consumer fiber content
- Soft and pliable freezer sheet with improved feel and acceptance with operations
- Improved barrier and "Moisture Vapor Transmission Rate" due to natural filler in poly blend
- Standard weight freezer paper offers an average of 3-6 months protection

Packaging Materials Defined

Tissue

Dry Wax

Dubl Wax®

Grease Resistant

Barrier Wax

Tissue: An untreated, lightweight tissue sheet with wet strength used for wrapping hot dogs, cones and foods with low moisture or grease content. Improve the “ease of eating” qualities of burgers by wrapping half the burger in our tissue wrap, then wrap the whole burger in a grease resistant, barrier wax, I-Rap®, insulated paper or foil insulated wrap for superior functionality and food presentation.

Dry Wax: Wax is driven into the paper fibers to produce a material that improves wet strength and moisture resistance. The paper provides good moisture resistance and moderate grease resistance. Our dry wax material is an affordable option for basic deli food wrap or bag applications.

Dubl Wax®: We use two different technologies to create Dubl Wax® paper. Our bags are coated on one side with heavy wax and on the other side with dry wax, which provides a strong moisture and moderate oxygen barrier to keep baked goods fresh longer. Our Dubl Wax® deli papers are aggressively infused with wax to provide a smooth uniform high-performance moisture barrier.

Grease Resistant: A grease resistant coating is applied to this paper to decrease grease penetration and staining. The paper creates a whiter, more opaque printing surface for custom logos or designs compared to dry wax. The paper is very breathable, which keeps wrapped or bagged sandwiches fresher and less soggy by letting steam and moisture escape. This material offers an affordable and functional solution for a variety of food-wrap and single serve bag applications.

Barrier Wax: This paper is coated on one side with a barrier wax blend. The material resists moisture and grease and extends holding times making it a favorite wrap among national quick service restaurant chains.

I-Rap®: A two-layer insulated paper wrap that combines a layer of grease resistant paper and a layer of absorbent paper bonded together with a honeycomb adhesive design to create air pockets, which provide improved insulation, heat retention and longer holding times. I-Rap® provides heat retention for hot food applications without a wax, foil or poly barrier. The two-ply paper wrap is biodegradable and commercially compostable. Our I-Rap® insulated paper allows moisture and steam to escape naturally, which keeps breads from getting soggy.

Dubl Shield®: Our innovative insulated Dubl-Shield® wrap has a highly functional grease and moisture barrier, but will allow moisture to escape, which keeps your bread or bun from getting soggy and losing freshness. The wrap has superior graphic printability on the flat grease resistant outer layer. Improved sustainable design offers an alternative to foil and poly insulated wraps and it's certified compostable by Cedar Grove, which gives it a clear end of life advantage. Dubl-Shield® can be printed on the grease resistant layer with one to four colors and can be produced with tinted adhesive to showcase a message or graphics on the inside of the wrap. Our proprietary triangle design air pockets help keep food hot during the average seven minute holding time, before consumption.

Clear Polypropylene: A clear plastic sheet with superior barrier properties for displaying cold sandwiches and other chilled foods in the deli merchandising case. The material extends the shelf life of displayed food with an oxygen and moisture barrier. Our clear polypro wraps improve the visibility, upscale image and impulse sales of your deli products.

Insulated Three Ply: A three-ply material, consisting of a very thin layer of poly sandwiched between two layers of paper, with excellent heat retention, grease resistance and moisture-absorption properties. It offers a superb alternative to paperboard clamshells in heat retention for holding times and in solid waste reduction. The material is safe for the microwave providing a practical, re-heatable substitute for foil insulated wraps. This multi-purpose wrap combines superior performance with a professional-grade look and feel to reinforce a quality image with customers.

Foil Insulated: Made of foil and paper laminated together to form a multi-functional material for a wide variety of foodservice applications. We laminate the two layers together with a honeycomb-shaped adhesive design. This design creates insulating air pockets between the layers, which improve heat retention and increase holding times. Honeycomb foil insulated wraps and bags provide the best overall heat retention, moisture/grease resistance, holding times, dead-fold and product appearance. BagcraftPapercon was the first company to manufacture this foil insulated wrap with the honeycomb design, and we continue to be the industry leader in flexible sandwich packaging innovation.

Natural Advantages of EcoCraft®

- Made with FDA food-grade, 100% unbleached, chlorine-free paper
- Packed in 100% recycled paperboard inner-carton and tray dispenser packaging to reduce raw-material waste
- Soy-blended dry wax on interfolded sheets reduce reliance on petroleum wax
- New dispenser carton and tray design includes printed facts and information about the sustainability benefits of EcoCraft®
- EcoCraft® products, on average, contain 20% pre-consumer waste fiber
- Multiple EcoCraft® products are third-party certified compostable
- Reduces your carbon footprint by purchasing form-fitting, "right size," flexible packaging with high case counts and small case-cube size
- An experienced national network of sales representatives that can help advise your business on ways to improve your sustainable packaging design

Did You Know?

20%

of wood is saved by using natural versus bleached paper fiber*

We believe in the continuous "Triple Bottom Line" approach of sustainable packaging design improvement:

Social Responsibility – good for the people

Ecological Responsibility – good for the planet

Economic Responsibility – affordable choices

With our EcoCraft® brand, we were the first company to offer a full stock line of unbleached, sustainable foodservice packaging in North America. We believe sustainability is an ongoing journey of continuous improvement and evolution. This approach propels us to constantly enhance our sustainable practices and products. **This commitment to affordability and innovation has allowed BagcraftPapercon to create the most recognized brand of sustainable flexible packaging available in the industry.**

Why Bagcraft?

Innovative

Ever since BagcraftPapercon first introduced our flexible foodservice packaging in 1947, we have been committed to developing innovative solutions that successfully address the ever-evolving needs and expectations of foodservice, supermarket and food processing companies worldwide. Such innovation has generated 17 patents and scores of national and international packaging awards for our company and positioned us as the largest paper-based, flexible foodservice packaging firm in North America. Most importantly, our innovative solutions have helped our clients greatly improve their foodservice operations, product performance and bottom lines.

Practical

BagcraftPapercon places a keen focus on value and function in the design and manufacturing of our products. Flexible foodservice packaging offers a practical blend of affordability and functionality, which makes it an excellent choice to reduce costs while improving bottom line growth. With more consumers and operators demanding practical packaging alternatives to rigid plastic and paperboard, our flexible paper packaging offers the most practical, cost-effective option available because it produces less waste, requires fewer raw materials and reduces manufacturing, transportation and storage costs.

Sustainable

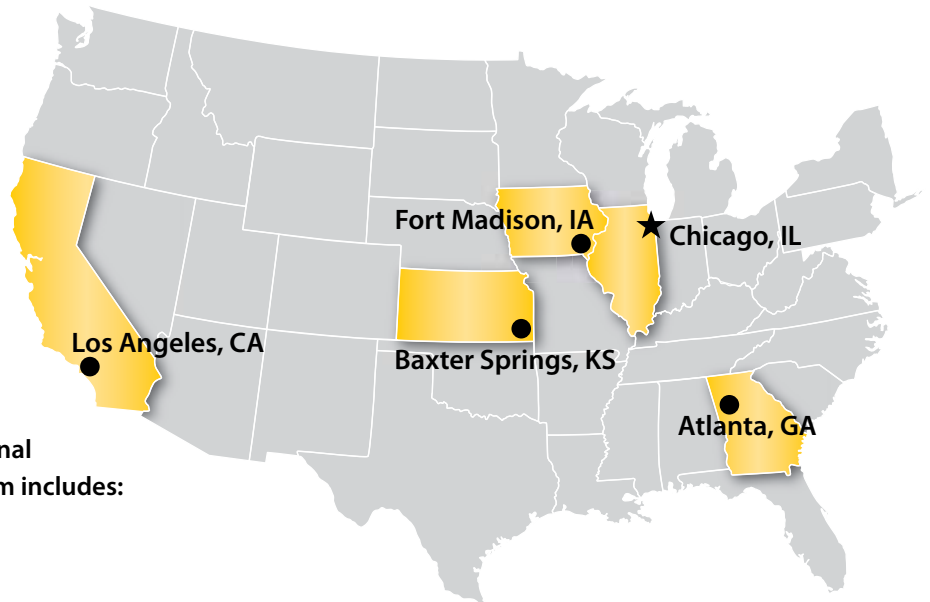

BagcraftPapercon has also been at the forefront in bringing sustainable packaging choices to the industry. With our EcoCraft® brand, we were the first company to offer a full stock line of unbleached, sustainable foodservice packaging in North America. We believe sustainability is an ongoing journey of continuous improvement and evolution. This approach propels us to constantly enhance our sustainable practices and products through eco-centered technologies, innovations and solutions that meet our sustainability goals and those of our clients. As members of the Sustainable Packaging Coalition, we support a common vision of attaining a true closed-loop system for all packaging that promotes positive economic and environmental outcomes. Part of this vision is ensuring that our sustainable packaging is affordable today in order to make a more significant and lasting impact on the environment for the future.

We make it easy for you to consolidate your flexible foodservice packaging purchases to one source.

- Five strategically located manufacturing plants across the United States
- Broad base of converting capabilities
- Industry leading graphics capabilities
- Innovative specialty packaging solutions
- Wide variety of stock products

Headquartered in Chicago, IL, our national manufacturing and distribution platform includes:

- 5 plants with a total of 867 employees
- 148 production lines
- Unique ability to produce products at multiple locations

Custom Converting & Printing

BagcraftPapercon offers the broadest range of specialty bag, sheet and roll converting capabilities in the flexible foodservice packaging industry. We manufacture high-quality custom packages on 148 different production lines to provide a wide variety of custom package and print designs. With our efficient, superior F&K presses, we can deliver state-of-the-art graphics capabilities that help differentiate your products on the shelf and on the go. Our long-term commitment to innovation and practical solutions enables us to expertly consult with you on packaging design, process graphics and rigid packaging replacements.

Please review the information we need before you request a quote for a custom product

Provide the individual bag, sheet or roll size

- Bag (width, gusset, length)
- Sheet (width and length)
- Roll (roll width and length or outer diameter)

Initial order quantity needed and the annual volume (units or cases)

Name of printed design or logo

Basis weight of paper if known

Type of paper or combination of materials (foil, bio-film or glassine)

Need a film window?

- Provide an explanation of the proposed window die or panel location on the package

Number of printed colors (provide PMS numbers)

Product application (what will the package be used for?)

Case pack sizes

Shipping/distribution information

How to measure a bag for quotes and production:

- Measure the face of the bag (width)
- Measure the gusset of the bag (side width)
- Measure the length of the bag (not including lip)

If you have a specific question about our custom or graphics capabilities, please call 800-621-8468, ext. 8012.
